MEMORANDUM

SUBJECT: Partial Reclassification of Special Account funds for the Anniston Lead Superfund Site located in Anniston, Calhoun County, Alabama.
Spill ID# A43T

FROM: Franklin E. Hill, Director
Superfund Division

TO: Cynthia L. Mackey, Director
Office of Site Remediation Enforcement
Office of Enforcement and Compliance Assurance

James E. Woolford, Director
Office of Superfund Remediation and Technology Innovation
Office of Solid Waste and Emergency Response

Reggie Cheatham, Director
Office of Emergency Management
Office of Solid Waste and Emergency Response

The purpose of this Memorandum is to serve as notification of Region 4's intent to reclassify a portion of the funds in the Anniston Lead Site Special Account #A43T in accordance with the "Revised Guidance on Reclassification of Superfund Special Accounts" (January 23, 2009). The total amount to be reclassified in this action is \$955,187.46. The Region plans to request recertification in accordance with the current fiscal year Deobligation Recertification Guidance.

Site Background

The Anniston Lead Superfund Site is located in and around Anniston, Calhoun County, Alabama and consists of residential and commercial properties which are or may be contaminated with hazardous substances, including PCBs and lead, resulting from the operations of numerous industrial facilities in Anniston, Alabama. Existing sampling data from approximately 4,000 residential properties has shown that about 900 of those residential properties sampled contain levels of PCBs and/or lead that posed an unacceptable level of risk to public health, welfare, or the environment. Under an Administrative Agreement and Order on Consent entered into with the United States, DII Industries L.L.C., FMC Corporation, Huron Valley Steel Corporation, McWane Inc., MW Custom Papers L.L.C., MeadWestvaco Corporation, MRC Holdings Inc., Phelps Dodge Industries Inc., United Defense L.P., United States Pipe and Foundry Company Inc., and Walter Industries Inc. (collectively the "Foothills Community Partnership") were required to perform sampling and, if necessary, cleanup on certain

residential properties. The Respondents have performed all the work under the Administrative Order except for performing cleanup on 24 properties that have refused access.

Settlement and Special Account

The Administrative Order on Consent contains the standard Special Account language that any money deposited in the Special Account is to be retained and used to conduct or finance response actions at or in connection with the Site, or to be transferred by the EPA to the EPA Hazardous Substance Superfund.

Discussion of Future Work and Rationale for Reclassification

The balance in the Special Account, as of August 13, 2015, is \$7,515,194.56 of which \$955,187.46 should be reclassified. The Region plans to leave \$6,560,007.10 in the Special Account to be used for cleaning up the remaining 24 residential properties that had previously refused access.

Discussion of Planned Use for the Recertified Funds

The Region will be reclassifying \$955,187.46. The 25% Region/75% Headquarters split applies to Remedial portion of this reclassification. The breakout PRC is as follows:

Removal: \$827,926.02 (100% to Region)
Remedial \$127,261.44 (25% Region amount \$31,815.44 and 75% Headquarters amount \$95,446.00)

After recertification the Regional funds will be used to fund the Regional Superfund Records Center.

Questions regarding this memorandum should be directed to the program contact Anita L. Davis. Ms. Anita L. Davis can be reached at (404) 562-8844.
